Descrição

According to Teleweb, evidence shows that access to information, counselling and online self-help programs plays an important role in suicide prevention, crisis advice and treatment of high prevalence mental disorders such as anxiety and depression. Online and telephone based services provide an accessible and anonymous service which people can access without having to leave the privacy of their homes.

Who benefits? Individuals across Australia who experience mild to moderate mental disorders such as anxiety and depression who may not currently receive treatment and particularly those people in rural and remote areas who face barriers in accessing face-to-face services.
